

FOR IMMEDIATE RELEASE

eMortgage Logic Founders Partner with A2Z Field Services.

Fort Worth, TX-July 28, 2009--- eMortgage Logic (EML) founders Ralph Sells, Jennifer Sells and Chris Santore are pleased to announce that they have partnered with A2Z Field Services (A2Z), an Ohio based Inspection and Preservation Company founded by President Bill McMullen.

When asked about this new venture Ralph Sells says, "We have been looking for a partner in this sector of the industry for the last 3 years and we keep coming back to A2Z Field Services. With our first hand knowledge of the contents of the BPO, we often see photos and comments related to the condition of these properties and now we will be able to inform our clients that we can help with preservation and /or securing the asset on their behalf. Over the course of the last 16 months, A2Z has made a significant investment in their technology which showed us they are committed to their clients, vendor network and the business. This venture is a gateway to several new offerings and hybrid products that will benefit both of our respective client bases. A2Z is also very active in the loan modification arena through their affiliation with Resolve Collection Corporation and President/CEO Mike Newell, a licensed debt collection agency. This alliance paves the way for our real estate brokers when asked to complete an interior BPO for the same purpose. While these are just a few of the added benefits, our true goal is to expand on our synergies and industry experience to offer a more complete solution to our clients. At EML we feel this is a natural progression to our growth and understanding of troubled markets at a granular or micro level. Utilizing information from A2Z, we can compare a broker's repaired assessment to that of data already collected or models created by A2Z. This method will allow for improved accuracy and essentially loss predictions based on condition while determining value."

Bill McMullen says "We are very excited to partner with eMortgage Logic, their commitment to technology and customer service is second to none. The ability to bundle services and programs for clients in today's challenging loan servicing environment is extremely important. This alliance combines networks of realtors, inspectors, REO field contractors, licensed debt collectors and loan modification personnel, with strong systems capabilities and Management Teams dedicated to offering premier services to the default loan servicing industry. We have always been A2Z but now even more so."

EML was established in April of 2002 to provide BPO's to the mortgage servicing industry and Wall Street Investors. EML is committed to being the provider of choice for all property valuations, tax data and other value added services within the mortgage banking industry. It is our promise to provide the highest level of client satisfaction by offering exceptional customer service, outstanding quality control and prompt order completion. By partnering with A2Z Field Services, we are certain that this standard will continue to flourish.

A2Z was established in April 2001 to provide mortgage field services to loan servicing companies, real estate auction companies and government agencies. They have earned their reputation helping clients improve their ability to service loans and care for their properties by providing prompt and accurate information while having an unparalleled dedication to customer service. A2Z currently operates its national servicing platform from their Corporate Office in Dublin, Ohio utilizing thousands independent contractors across the United States. As part of the integration process, A2Z will move their Executive team to Texas to work closely with the new partners from EML and RESOLVE, both currently located in the Dallas area.
